

Revue de la filière agroalimentaire

FOOD magazine

L'ALIMENTAIRE À LA LOUPE !

Distribution

Our team is eager to put forward the first Moroccan magazine entirely dedicated to food processing industry's professionals from the pitchfork to the table fork (industry, retailing, Horeca and their suppliers).

Published by a company called Silvestri Media, this monthly magazine benefiting from an international scope has a print run of 10 000 copies. Indeed, 6 000 copies are distributed by name to decision makers and the other 4 000 to numerous news stands across the Kingdom.

Thanks to the notoriety developed among professionals and to the certification of its publication, FOOD Magazine became a dynamic and accurate communication tool for advertisers who aim at targetting agro-industry's actors.

Animated by a team of professional journalists, FOOD Magazine deals with the development of the food industry by offering a sound communication network to swap and share ideas between the main economic operators. Besides, FOOD Magazine organises events such as the well-known « FOOD Magazine roundtables ».

More than a magazine, we implement everything in order to bring solutions to our readers by raising advertisers' awareness, creators of value in this sector.

The magazine is also associated to a website called www.foodmagazine.ma, natural and interactive version of the publication.

FOOD Magazine, your partner for a better communication.
